

Several of the radio stations that I listen to, including K-LOVE, depends upon access to FM Translators. Most of these stations are not-for-profit, or other small operations that meet the needs of specific constituencies. Were K-Love to be displaced by the type of FM broadcasts so typical of large format and/or for-profit operations, we would have no safe place to turn to hear family friendly radio.

The government has failed to protect the family values that used to be respected in Prime Time TV and Radio. Please don't take away the only remaining broadcast venue for non-offensive radio.
